SOFTWARE ENGINEER

08061417226 abdulbasitadebajo1619@gmail.com [Portfolio Website](#) Nigeria

SUMMARY

Full stack development professional with 2 years of experience in software development, expert in ReactJS, NodeJS and MongoDB. Key achievements include automating PDF generation for account details, reducing manual processing time by 90%, and enhancing overall user experience leading to a 40% increase in successful registrations and loan applications. Seeking a Full Stack Web Developer position, where my software development and web design skills can be leveraged to support your mission of providing innovative digital solutions to customers.

EXPERIENCE

Full Stack Developer

Lagos, Nigeria

[Unilag Microfinance Bank](#)

12/2024 - Present

The bank provide customer-focused financial services, including savings, loans, and investments, with an emphasis on financial literacy and empowering small businesses. Leveraged technology for efficient digital banking solutions, serving individuals and SMEs within and beyond the University of Lagos community.

- Developed two web applications using **React**: one for **corporate account creation** and another for **quick loan applications**.
- Automated the generation of PDFs for account and loan details using **jspdf**, reducing manual processing time by **90%**.
- Integrated **Brevo** (formerly Sendinblue) to email PDFs to clients, improving communication efficiency by **80%**.
- Enhanced user experience, resulting in a **40%** increase in successful registrations and loan applications within the first month.
- Developed an HR system for the bank using **React** and **MongoDB**.

Freelance Web Developer

Nigeria

[Website for Bolt & Beams](#)

07/2024 - 08/2024

www.boltandbeams.com.ng

Bolt and Beams is a construction company located in Abuja, Nigeria.

- Built the site using **HTML**, **CSS**, and **JavaScript**, ensuring a clean and professional design aligned with the company's branding.
- Designed and developed a responsive website for **Bolt & Beams**, showcasing their civil engineering services and enabling direct client communication.
- Integrated a contact form with validation to streamline inquiries.
- Deployed the website on **Vercel** and managed the acquisition of a customized domain: www.boltandbeams.com.ng.
- Ensured the website was mobile-friendly, optimized for performance, and accessible across all devices using the best technical **SEO** practices.
- Delivered a live, fully functional website, enhancing the company's online visibility and client engagement.
